

# Project: Prosper Education

Hosting infrastructure config, localization,  
Design/Finished Art, Wordpress/HTML5&CSS3 build

Year: 2017/18

RoyalABC is an early childhood (3-6)  
English language learning software by  
Prosper Education.

The server infrastructure serving  
the Product and Support website is  
configured specifically for access within  
the target audience (mainland China)  
ensuring reliable access, including  
sanitization of Wordpress and LMS  
plugins of reliance on Google services,  
including CDNs. Optimization methods  
include the configuration of Mod  
Pagespeed and use of h2 for reduced  
loading times.
